PROFESSIONAL SUMMARY

Software Engineer with 2.7 years of experience at Tech Mahindra contributing to enterprise application development across backend services and frontend integrations. Experienced in Java 17, Spring Boot, REST APIs, ReactJS, SQL, Spring Data JPA, Hibernate, and microservices, with hands-on work in API documentation, Redis caching, debugging, and automated testing. Developed and maintained REST APIs, improved ClickHouse query performance by approximately 10%, and automated 125 REST API test cases, reducing regression testing time by approximately 60%. AWS Certified Cloud Practitioner with experience collaborating in Agile teams and CI/CD workflows.

EXPERIENCE

Tech Mahindra Dec 2023 – Jul 2026

Associate Software Engineer — Project: TDW, Semiconductor Data Management System Bengaluru, IN

- Developed and maintained REST APIs and Java backend services using Spring Boot, implementing business logic, request validation, and exception handling.
- Applied Core Java, OOP, Collections, Spring Data JPA, and Hibernate to implement maintainable service logic and database interactions.
- Created and updated Swagger/OpenAPI documentation for REST APIs and integrated frontend components with backend services using ReactJS, Axios, and Fetch API.
- Worked with MariaDB and ClickHouse on SQL data operations, query analysis, indexing, and troubleshooting.
- Implemented Redis caching in the project and worked with existing data-processing and ETL-related operations.
- Debugged backend and API issues; contributed to code reviews, unit/integration testing, and regression validation.
- Used Git/Bitbucket, Maven, and Jenkins CI/CD workflows; collaborated with QA and DevOps teams in an Agile/Scrum environment. DevOps handled subsequent deployment activities.

PROJECTS

Microservices Quiz Application

Java, Spring Boot, MySQL, Spring Cloud Gateway, Eureka, FeignClient

- Developed a Java-based **microservices** application with separate **Question and Quiz services**, using **Spring Cloud Gateway** to route API requests between services.
- Implemented **service discovery** and dynamic service registration using **Netflix Eureka**, reducing reliance on hardcoded service URLs.
- Integrated **inter-service REST communication** using **FeignClient** and configured **load balancing** to support communication between **microservices**.

CERTIFICATES / ACHIEVEMENTS

- **AWS Certified Cloud Practitioner** — Amazon Web Services (2026).
- **Database performance** — Improved analytical query performance on ClickHouse by approximately 10%.
- **REST API test automation** — Automated 125 test cases using Postman collections, reducing regression testing time by approximately 60%.

TECHNICAL SKILLS

Programming: Java 17, Core Java, Java 8 Streams, SQL, JavaScript ES6+, Python (familiarity)

Software Engineering: OOP, Collections, Exception Handling, DSA, SOLID, debugging, clean code, code reviews, multithreading and design patterns (knowledge)

Backend & APIs: Spring Boot, Spring MVC, Spring Data JPA, Spring JDBC, Hibernate, REST APIs, Swagger/OpenAPI

Microservices & Frontend: Spring Cloud Gateway, Eureka, FeignClient, WebClient, ReactJS, HTML5, CSS3, Axios, Fetch API

Databases & Caching: MariaDB, ClickHouse, Redis; MySQL; SQL joins, indexing, query optimization

Testing & Tools: Postman, JUnit 5, Mockito, Spring Boot Test, MockMvc, JMeter, Git, GitHub, Bitbucket, Maven, Jenkins CI/CD

Cloud & Practices: AWS Lambda, EC2, S3; Docker/Kubernetes (project exposure); Agile/Scrum, SDLC, technical documentation; GitHub Copilot, Claude, ChatGPT

Additional Knowledge: Kafka, Spring Security, JWT/OAuth2, Spring WebFlux, OpenSearch/Elasticsearch (knowledge/exposure)

EDUCATION

Sree Vidyanikethan Engineering College Graduated 2023

B.Tech — Electronics & Communication Engineering | Percentage: 87.07%
