PROFESSIONAL SUMMARY

Software Engineer with 2.7 years of experience at Tech Mahindra building Java backend services and 25+ REST APIs using Spring Boot. Hands-on with Core Java, Java 8, Spring MVC, Spring Data JPA, Hibernate, SQL, Redis caching, and ReactJS, with experience in API design, validation, exception handling, and cross-layer integration. Automated 125 REST API test cases, reducing regression testing time by approximately 60%, and improved database query performance by approximately 10%. AWS Certified Cloud Practitioner experienced with Agile delivery, Git, Maven, Jenkins CI/CD, debugging, and AI-assisted development tools.

EXPERIENCE

Tech Mahindra Dec 2023 – Jul 2026

Associate Software Engineer — Project: TDW, Semiconductor Data Management System Bengaluru, IN

- Developed and maintained 25+ REST APIs and Java backend services using Spring Boot, implementing business logic, request validation, exception handling, and API documentation with Swagger/OpenAPI.
- Applied Core Java, Java 8, OOP, Collections, and problem-solving fundamentals to build maintainable backend components; strengthened service reliability through debugging and code reviews.
- Used Spring Data JPA and Hibernate with SQL joins, indexing, and query analysis to optimize database access and improve query performance by approximately 10%.
- Worked with MariaDB and ClickHouse on data-processing and ETL workflows; implemented Redis caching and supported database troubleshooting.
- Automated 125 REST API test cases using Postman collections, reducing regression testing time by approximately 60%; contributed to unit, integration, and regression testing using JUnit 5, Mockito, and Spring Boot Test.
- Used Git, Bitbucket, and Maven in Agile delivery; contributed through code reviews and Jenkins CI/CD workflows, collaborating with QA and DevOps teams.

PROJECTS

Microservices Quiz Application

Java, Spring Boot, Spring Cloud Gateway, Eureka, FeignClient

- Developed a Java/Spring Boot microservices application with separate Question and Quiz services, using Spring Cloud Gateway to route REST API requests.
- Implemented service registration and discovery using Netflix Eureka, enabling services to locate one another without hardcoded URLs.
- Integrated inter-service REST communication using FeignClient and configured client-side load balancing between microservices.

CERTIFICATES / ACHIEVEMENTS

- **AWS Certified Cloud Practitioner — Amazon Web Services (2026).**

TECHNICAL SKILLS

Programming Languages: Java 17, Core Java, Java 8, JavaScript (ES6+), SQL

Java Fundamentals: OOP, Collections Framework, Exception Handling, Data Structures & Algorithms, SOLID Principles, Multithreading (knowledge), Design Patterns (knowledge)

Backend Technologies: Spring Boot, Spring MVC, Spring Data JPA, Spring JDBC, Hibernate ORM, RESTful APIs, Microservices, Swagger/OpenAPI, API Validation, Exception Handling

Frontend Technologies: ReactJS, HTML5, CSS3, JavaScript, Axios, Fetch API

Microservices & Integration: Spring Cloud Gateway, Eureka, FeignClient, WebClient, Inter-Service REST Communication

Databases & Caching: MariaDB, ClickHouse, Redis, MySQL (personal project), SQL Joins, Indexing, Query Optimization

Tools, Testing & DevOps: Git, Bitbucket, GitHub, Maven, Jenkins CI/CD, Postman, JUnit 5, Mockito, Spring Boot Test, MockMvc, JMeter, Docker (exposure), Kubernetes (exposure), AWS Lambda/EC2/S3 (project context)

Engineering Practices & AI Tools: Agile/Scrum, SDLC, Unit & Integration Testing, Code Reviews, Debugging, Clean Code, Technical Documentation, GitHub Copilot, Claude, ChatGPT

EDUCATION

Sree Vidyanikethan Engineering College Graduated 2023

B.Tech — Electronics & Communication Engineering | Percentage: 87.07%
