PROFESSIONAL SUMMARY

Software Engineer with 2.7 years of experience at Tech Mahindra building and maintaining Java-based backend services and REST APIs. Skilled in Java 17, Spring Boot, Spring Data JPA, Hibernate, SQL, and database performance optimization. Experienced in implementing business logic, request validation, exception handling, and data workflows using MariaDB and ClickHouse. AWS Certified Cloud Practitioner with experience supporting testing, troubleshooting, and Agile delivery.

EXPERIENCE

Tech Mahindra Dec 2023 – Jul 2026

Associate Software Engineer — Project: TDW, Semiconductor Data Management System Bengaluru, IN

- Developed and maintained Java and Spring Boot backend services, implementing business logic, request validation, exception handling, and application workflows.
- Improved database query performance by approximately 10% through Spring Data JPA/Hibernate tuning, SQL join analysis, indexing, and query investigation.
- Supported data-processing workflows and ETL-related operations using MariaDB and ClickHouse, including database troubleshooting.
- Applied Core Java, object-oriented programming, collections, and multithreading concepts to build modular, maintainable backend components.
- Investigated backend defects and API issues; contributed to debugging, code reviews, and unit/integration testing to support application reliability.
- Used Git and Maven for version control and builds, and collaborated through Jenkins CI/CD workflows and Agile development practices.

PROJECTS

Microservices Quiz Application

Java, Spring Boot, Spring Cloud Gateway, Eureka, FeignClient

- Built a Java-based microservices application with separate Question and Quiz services, using Spring Cloud Gateway for API routing.
- Configured service discovery and dynamic service registration with Netflix Eureka, reducing reliance on hardcoded service URLs.
- Integrated inter-service REST communication through FeignClient and configured load balancing between microservices.

CERTIFICATES / ACHIEVEMENTS

- **AWS Certified Cloud Practitioner** — Amazon Web Services (2026).

TECHNICAL SKILLS

Programming Languages: Java 17, Core Java, SQL, Java 8 Streams

Java Fundamentals: Object-Oriented Programming (OOP), Collections Framework, Exception Handling, Multithreading, Data Structures and Algorithms, SOLID Principles

Backend Technologies: Spring Boot, Spring MVC, Spring Data JPA, Spring JDBC, Hibernate ORM, RESTful Web Services, API Validation, Exception Handling, Microservices Architecture

Frontend Technologies: HTML5, CSS3, JavaScript (ES6+), React.Js

Microservices & Integration: Spring Cloud Gateway, Eureka, FeignClient, WebClient, Inter-Service REST Communication

Databases: MariaDB, ClickHouse, MySQL, Oracle SQL, SQL Joins, Indexing, Query Optimization

Tools & DevOps: Git, GitHub, Maven, Jenkins CI/CD, Postman, JUnit 5, Mockito, Spring Boot Test, MockMvc, JMeter, Docker (exposure), Apache Kafka (exposure)

Software Engineering Practices: Agile/Scrum, SDLC, Unit Testing, Integration Testing, Code Reviews, Debugging, Clean Code, Technical Documentation

EDUCATION

Sree Vidyanikethan Engineering College Graduated 2023

B.Tech — Electronics & Communication Engineering | Percentage: 87.07%
